4110023060 – DENSE SPRAY GREASE 200ML

Technical features:

This lubricant is ideal for hard or semi-rigid surfaces, such as metal, plastic and rubber, thanks to its high-density formulation. The practical spray allows for easy application even on complex mechanisms and gears in operation, offering a cleaner alternative to grease-based lubricants. Once applied, the product adheres firmly without dripping, forming a protective barrier that significantly reduces friction and prevents wear and oxidation. The particles contained in the formula bind to the treated surface, ensuring effective long-term protection. The lubricant is resistant to centrifugal force, as well as water, salt and mud, maintaining excellent performance in difficult conditions.

Chemical-physical properties:

Physical state	Liquid - aerosol
Color	Colorless
Odor	Characteristics
Flash point	< 23°C
Density	--
PH	5

How to use:

Shake the container well before use, spray the product on the parts to be treated, clean the excess product and drips with a cloth, move the treated parts. Leave to act for a few minutes.

The above information appears to be exact and accurate, but any technical specification or data present is not guaranteed, since Meccanocar does not have direct control over the conditions of use of the products. In case of uncertainty it is always advisable to do preliminary tests.
